

Amundson 9.9

Description Dedicated board for experienced riders in the surf.

Specifications 9'9" x 28 1/2" x 4" 131 liters, 23 pounds

Item 58-6811099

Dedicated to surf, the 9'9" is designed with a fast wave rocker for early entry and down-the-line speed. The outline and rail shape draw from Amundson's experience with traditional longboards, with added width and volume for stability in the surf. With a 6.5" center fin and two capable thrusters, the 9'9" is ready for most anything the ocean can dish out. Built in our Custom Surf Epoxy (CSE) technology, the 9'9" has a full wood sandwich deck and bottom, for the proper flex and resiliency required to shred any wave. Our high-traction tail patch and kicker plate will come in handy when you're feeling in the groove, which on this board, is something you'll be getting very used to.

Amundson 9.9 Features

CSE

Built in our CSE technology with a wood sandwich deck and bottom for stiffness, strength and resiliency.

Thruster

The 9'9" Surf comes complete with a 6.5" center fin and two powerful Future Fins thrusters for optimal performance and maximum grip in tight turns.

Molded Handle

Every Amundson board comes complete with a heavy duty molded handle for convenient transport.

Deck Pad

Every Amundson board comes complete with a 3mm EVA deck pad professionally installed at the factory.

Kicker

The 9'9" Surf comes complete with high-traction EVA tail patch and kicker for extreme performance in the waves.

9.9 Cross-Section
