

Amundson 11.4 TR

Description Outstanding flat-water board for lighter riders, beginners.

Specifications 11'4" x 29" x 4 3/4" 187 liters, 27 lbs

Item 58-6812114

Dedicated flat water touring/ racing for lighter riders. Little sister to the 12'6" TR, the 11'4" is designed for riders up to 150 pounds. This sleek craft is perfect for lighter riders who are not interested in racing, but also don't want to paddle a surf-style board around the lake. They get the improved glide and speed that the TR boards offer, but without all the extra length, volume, and weight of a full 12'6". The displacement bow slices through the water smoothly, and the flat-water rocker line keeps on track during sessions geared towards fitness and fun.

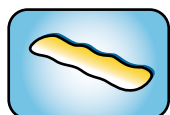

Amundson 11.4 TR Features

AST

Semi-custom built in epoxy AST construction for the best balance of light weight, stiffness and outstanding durability.

Molded Handle

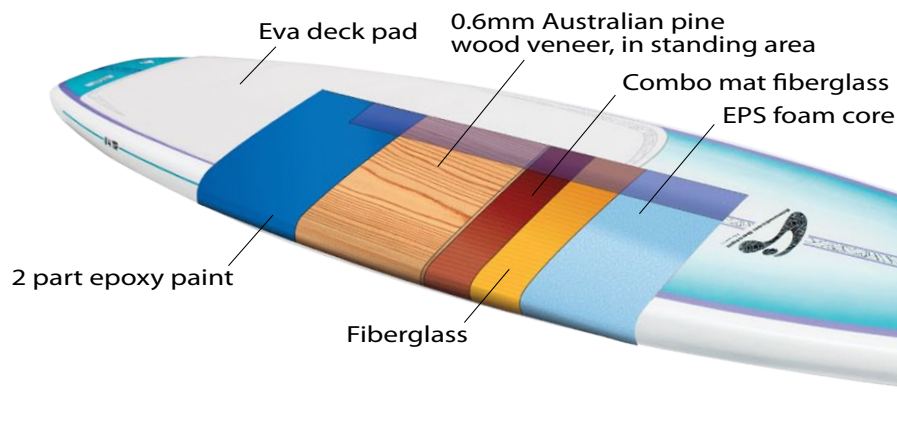

Every Amundson board comes complete with a heavy duty molded handle for convenient transport.

Deck Pad

Every Amundson board comes complete with a 3mm EVA deck pad professionally installed at the factory.

11.4 TR Cross-Section

Amundson 12.6 TR

Description Dedicated flat water touring/ racing.

Specifications 12'6" x 29 1/2" x 5 1/4" 247 liters, 32 1/2 lbs.

Item 58-6812126

"TR" stands for Tour & Race, and that is exactly what the 12'6" TR is designed to do. The 12'6" TR offers the type of blistering flat water speed and efficiency which will draw plenty of attention in the popular 12'6" racing class. Yet, unlike many specialized race boards, the 12'6" TR is comfortable, stable and eminently well-mannered. Each of these attributes help to make this board the ideal platform for touring as well. With its fine entry and pronounced V-shape, the nose cuts easily through chop for a smooth, fast ride. Vertical rails and a flat bottom offer clean water release and stability. Epoxy AST construction provides the best balance of light weight, stiffness and outstanding durability.

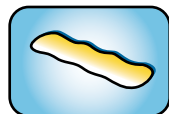

Amundson 12.6 TR Features

AST

Semi-custom built in epoxy AST construction for the best balance of light weight, stiffness and outstanding durability.

Molded Handle

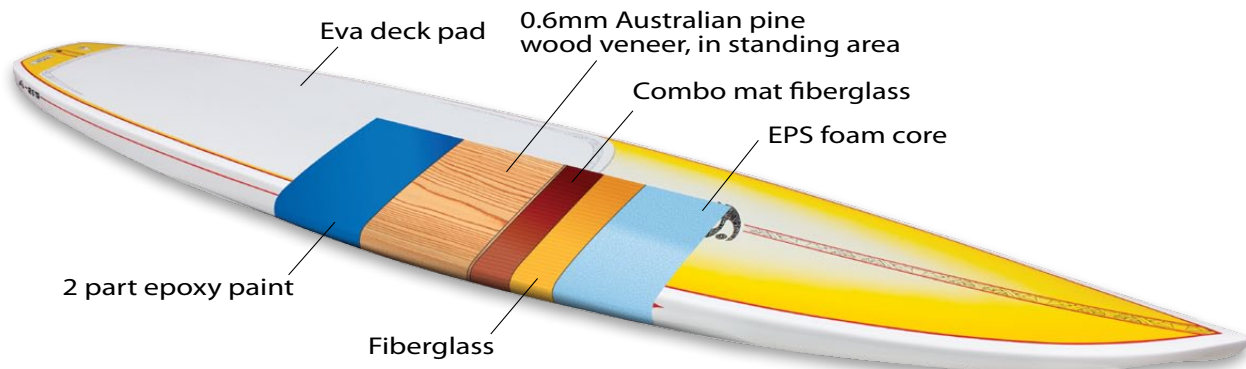

Every Amundson board comes complete with a heavy duty molded handle for convenient transport.

Deck Pad

Every Amundson board comes complete with a 3mm EVA deck pad professionally installed at the factory.

12.6 TR Cross-Section

Amundson 12.6 TR-X

Description Lightweight carbon wood sandwich tour/ race board.

Specifications 12'6" x 29 1/2" x 5 1/4" 247 liters, 28 lbs.

Item 58-6812127

The TR-X offers the same shape as our popular 12'6" TR, but in our exclusive CWS technology where a full carbon/ Kevlar bottom and wood sandwich deck shaves 4 pounds (1.8kg) off the weight! The TR-X offers the type of blistering speed which will draw plenty of attention (and perhaps envy) in the highly popular 12'6" racing class. Yet, unlike many specialized race boards, the 12'6" TR is still stable and eminently well-mannered. With its fine entry and pronounced V-shape, the nose cuts easily through chop for a smooth, fast ride. Vertical rails and a flat bottom offer clean water release and stability. Exclusive CWS technology provides stiffness, strength and extraordinarily light weight.

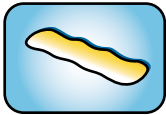

Amundson 12.6 TR-X Features

CWS

Our exclusive CWS technology utilizes a full Carbon/ Kevlar bottom and wood sandwich deck for stiffness, strength and extraordinarily light weight.

Molded Handle

Every Amundson board comes complete with a heavy duty molded handle for convenient transport.

Deck Pad

Every Amundson board comes complete with a 3mm EVA deck pad professionally installed at the factory.
